**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE TRADEMARK TRIAL AND APPEAL BOARD**

In re Application No. 86/257,714 for the mark EYENSTEIN, filed April 21, 2014, and published September 16, 2014

THE HEBREW UNIVERSITY OF JERUSALEM

Opposer,

v.

IC720, LLC

Applicant.

Opposition No. _____

NOTICE OF OPPOSITION

The Hebrew University of Jerusalem (“Opposer”), is a not-for-profit corporation organized and existing under the laws of Israel, with an address at Givat Ram, P.O. Box 34165, Jerusalem 91341, Israel, and believes that it is or will be damaged by the issuance to registration of EYENSTEIN, Application No. 86/257,714 (“Applicant’s Mark”) and hereby opposes registration of Applicant’s Mark under the provisions of Section 13 of the Trademark Act of 1946, 15 U.S.C. § 1063.

As grounds for opposition, Opposer alleges the following:

1. Opposer is the owner of all right, title and interest in, to and of the late, famous scientist and genius, Albert Einstein, including the publicity rights in his name and likeness, service marks and trademarks.
2. The name and mark EINSTEIN has been used by those licensed or otherwise authorized by Opposer on or in connection with a broad variety of goods and services prior to Applicant’s filing date, including but not limited to computer software and hardware, data protection and storage-related services, marketing and consulting services, food products, coffee, tea, bakery products, beverages, bottled water, candy, tee-shirts, hats, mugs, and posters, as well

as computers, software applications, video games, educational CD-ROMS with books sold as a unit, providing access to an on-line computer data base to students, and more.

3. Opposer owns numerous EINSTEIN marks, including, *inter alia*, incontestable U.S. Registration No. 1,479,104 for EINSTEIN in connection with services in International Class 42; U.S. Registration No. 4,339,058 for EINSTEIN in connection with goods in International Class 9; U.S. Registration No. 3,591,305 for ALBERT EINSTEIN in connection with goods in International Classes 14, 16, 18, 20, 21, 25 and 28; as well as pending U.S. Serial No. 75/519,755 for EINSTEIN in connection with services in International Class 36; U.S. Serial No. 78/487,259 for EINSTEIN in connection with services in International Class 39; U.S. Serial No. 78/273,213 for ALBERT EINSTEIN in connection with goods and services in International Classes 9 and 41; U.S. Serial No. 78/273,219 for EINSTEIN in connection with goods and services in International Classes 9, 14, 16, 18, 20, 21, 25, 28, and 41; and others (hereinafter collectively referred to as “EINSTEIN Marks”). Opposer’s exclusive right to use the EINSTEIN Marks is evidenced by these applications and registrations. Further, the referenced registrations are valid, subsisting, and provide prima facie evidence of Opposer’s exclusive right to use the marks in commerce on its own and through its authorized licensees.

4. Applicant has applied to register Applicant’s Mark in connection with “[b]uilding security systems comprising software and hardware for providing picture, video, alarm status, building plans, and other information to a remote station.” Applicant’s Mark is confusingly similar to the EINSTEIN Marks and the applied-for goods are related to goods and services of Opposer and/or its licensees, or to goods and services into which Opposer intends to expand, or in connection with which consumers will believe Opposer has expanded.

5. Applicant’s Mark is confusingly similar to the EINSTEIN Marks and Applicant’s use of the phonetic sound of the name “EINSTEIN” is likely to conjure up an association with Dr. Albert Einstein, who is well known as the preeminent genius of the twentieth century.

6. Due to the enormous and longstanding fame of the late scientist and genius named Dr. Albert Einstein and Opposer's ownership and use of the name and mark EINSTEIN in connection with a broad variety of goods and services, including a pending application for data protection and storage-related services, Applicant's Mark falsely suggests a connection with, affiliation with, association or sponsorship by Opposer.

7. Upon information and belief, Applicant is well aware of and seeks to foster that false connection with the late, well known scientist and genius, Dr. Albert Einstein.

8. Since prior to Applicant's filing date, the name and mark EINSTEIN has become associated with Opposer, such that should Applicant begin to use Applicant's Mark in connection with the applied-for goods, the consuming public will likely be confused to believe that Applicant's goods are authorized, sponsored, licensed or controlled by Opposer, or are in some way related to Opposer.

9. Since long prior to the filing date of Applicant's application, Opposer and its licensees have used the EINSTEIN Marks in connection with the sale and advertising of its goods and/or services, including computer software and hardware.

10. Opposer and its licensees have used and advertised the EINSTEIN Marks over a period of many years and, thus, these marks have become well known and famous among prospective purchasers as distinctive indicators of the origin of Opposer's goods and services.

11. Notwithstanding Opposer's prior established rights in the EINSTEIN Marks, Applicant, IC720, LLC., a limited liability corporation with an address of 3050 N. Andrews Ave. Ext., Pompano Beach, Florida 33064, filed Application No. 86/257,714, EYENSTEIN, for "[b]uilding security systems comprising software and hardware for providing picture, video, alarm status, building plans, and other information to a remote station" in International Class 9.

LIKELIHOOD OF CONFUSION - §2(d)

12. Paragraphs 1 through 11 above are incorporated by reference as part of this Count.

13. The mark which Applicant seeks to register is identical to or so closely resembles the EINSTEIN Marks that the use and registration thereof is likely to cause confusion, mistake and/or deception as to the source or origin of Applicant's goods in violation of Section 2(d) of the Trademark Act, and will injure and damage Opposer and the goodwill and reputation symbolized by the EINSTEIN Marks.

14. Applicant's goods are so closely related to Opposer's goods and services that the public is likely to be confused, or deceived, or to assume erroneously that Applicant's goods are those of Opposer or that Applicant is in some way connected with, sponsored by or affiliated with Opposer, all to Opposer's irreparable damage. Specifically, Applicant allegedly intends to use Applicant's Mark in connection with goods in Class 9 and related to privacy and security, where this is a category of goods and services that consumers are likely to associate with Opposer and/or Opposer's licensees—especially given Opposer's current pending application covering data security and privacy-related services in Class 39 and Opposer's other marks covering Class 9.

15. Likelihood of confusion is enhanced by the fact that Applicant's Mark and the EINSTEIN Marks all contain the name "EINSTEIN," with Applicant's Mark being phonetically identical, thus consumers will assume that goods offered under Applicant's Mark originate with or are sponsored by Opposer.

16. Applicant is not affiliated or connected with or sponsored by Opposer, nor has Opposer approved of the goods offered by Applicant in connection with the applied-for mark, nor has Opposer granted Applicant permission to use the applied-for mark.

DECEPTION/FALSE SUGGESTION OF CONNECTION - § 2(a)

17. Paragraphs 1 through 16 above are incorporated by reference as part of this Count.

18. Applicant's Mark is identical to or so closely resembles the EINSTEIN Marks that Applicant's Mark is likely to cause deception in violation of Section 2(a) of the Trademark Act in that the mark misdescribes the nature or origin of the goods, purchasers are likely to believe that the misdescription actually describes the nature or origin of the goods, and this is likely to materially alter purchasers' decisions to acquire Applicant's goods.

19. Applicant's Mark is identical to or so closely resembles the EINSTEIN Marks that it falsely suggests a connection with Opposer and implies an association with Dr. Albert Einstein in violation of Section 2(a) of the Trademark Act, because Applicant's Mark points uniquely to Opposer. Therefore, purchasers will likely assume that goods offered under Applicant's Mark are connected with Opposer.

20. The dominant part of Applicant's Mark is essentially "EINSTEIN," thus Applicant's Mark is clearly drawing a connection between the services listed in the application and the genius of Dr. Albert Einstein.

21. When Applicant's Mark is used in connection with the goods described in its application, said mark will cause purchasers to mistakenly assume that Opposer is endorsing, attempting to promote, or encouraging the sale of Applicant's goods by permitting the applied-for mark to be used in connection with such goods.

22. Applicant's Mark is deceptive in that it falsely suggests a connection with or approval by Opposer, all to Opposer's irreparable damage.

DILUTION - § 43(c)

23. Paragraphs 1 through 22 above are incorporated by reference as part of this Count.

24. For many years, many of the EINSTEIN Marks have been widely used and extensively advertised in the United States and, therefore, the EINSTEIN Marks have become well known and famous as distinctive symbols of Opposer's goodwill.

25. The EINSTEIN Marks became well known and famous before Applicant applied for registration of Applicant's Mark.

26. Applicant's Mark will cause dilution of the distinctive quality of Opposer's famous EINSTEIN Marks.

27. Use and registration of Applicant's Mark will lessen the capacity of Opposer's famous EINSTEIN Marks to identify and distinguish Opposer's goods and services.

28. Use and registration of Applicant's Mark will tarnish the goodwill symbolized by Opposer's famous EINSTEIN Marks.

29. Likelihood of dilution and damage to Opposer's goodwill is enhanced by the fact that Opposer will have no control over the nature and quality of the goods offered under Applicant's Mark; and prospective customers who encounter defects in the quality of Applicant's goods will attribute those defects to Opposer, which will tarnish Opposer's goodwill.

30. Use and registration of Applicant's Mark will cause dilution by blurring, thus diluting or weakening the unique and distinctive significance of Opposer's famous EINSTEIN Marks to identify and distinguish one source.

31. By reason of all of the foregoing, Opposer will be damaged by the registration of Applicant's Mark and registration should be refused.

WHEREFORE, Opposer respectfully requests that Application No. 86/257,714 be refused registration.

Dated: October 14, 2014

Respectfully submitted,
ARENT FOX LLP
